$ cat /var/log/failures.txt

THE PROBLEM

SURVEILLANCE TOOLS

Hosted tools can collect workflow data and tie core work to vendor accounts and policies.

CONSOLIDATED INFRA

Hosted infrastructure can make migration, independent operation, and long-term access difficult.

UNDERFUNDED OSS

Public software requires ongoing engineering, documentation, maintenance, and hosting.

> *COUNTERMEASURES INITIALIZED*

OUR APPROACH

approach.manifest

$

01 // **PUBLIC AND SELF-HOSTED**
The catalog links to public repositories. Projects offer self-hosting where their current implementation supports it.

02 // **PUBLIC-WORK FUNDING**
Patreon support funds public work. It does not buy private access or roadmap control. Commercial services remain planned.

03 // **PUBLISHED PROJECT STATES**
The public catalog records active and incubating work. Repository history shows the work behind each listed project.

$ ls -la /subcult/projects/

WHAT WE BUILD

DEVELOPER TOOLS

CLI utilities, workflow automation, and developer infrastructure

SELF-HOSTED SOFTWARE

Software that operators can run on their own systems

MEDIA PIPELINES

Audio, video, transcription, and publishing tools

DATA AND RESEARCH

Tools for packaging, searching, and tracing source material

DOCUMENTATION

Technical documentation, zines, and practical guides

COMMUNITY SOFTWARE

Tools for events, governance, mutual aid, and discovery

// SELECTED PROJECTS //

SELECTED PROJECTS

SUBCULT.TV

Active. Public site, project catalog, and zine for the collective.

React · TypeScript · Tailwind · Go API

CLPR

Active. Twitch clip curation platform for discovering and sharing clips.

Go · TypeScript · React · Twitch API

CUTROOM

Incubating. Video production pipeline with agent handoffs and attribution.

TypeScript · Next.js · AI Agents · Remotion API

SUBCORP

Incubating. Self-hosted multi-agent system with semantic memory.

TypeScript · Next.js · PostgreSQL · OpenRouter

> all systems nominal

KEY MILESTONES

[+] Public website with project catalog, zine, and investor materials

[+] Go API backend with admin dashboard and metrics

[+] Project catalog with active and incubating states and repository links

> REVENUE_STREAMS.init()

BUSINESS MODEL

ACTIVE **PATREON**

Support funds public work. It does not buy private access or roadmap control.

PLANNED **COMMERCIAL TIERS**

Premium features and hosted versions of open-source tools for teams and businesses.

PLANNED **CONSULTING**

Implementation consulting for organizations adopting open-source infrastructure.

PLANNED **SPONSORSHIPS**

Project and content sponsorships reviewed against the scope of the public work.

// DEPLOYMENT SCHEDULE //

ROADMAP

roadmap.current

$

Current ⇒ Maintain active projects and the public project catalog

Next ⇒ Move incubating projects toward usable releases

Next ⇒ Evaluate commercial tiers and implementation consulting

Later ⇒ Fund project work through sponsorships and partnerships

> current states and next work listed above

> *FUNDING.allocate()*
